Oscar Testing Guide

Oscar Platform Testing Guide

Version: 1.0 **Date:** January 2026 **URL:** https://oscar-zorgcoordinatie-482297690628.europe-west4.run.app

---

Overview

Oscar is a healthcare coordination platform that connects patients with care providers. This guide explains how to test the complete patient-to-provider flow using dummy test data.

Prerequisites

- A valid email address (to receive test emails)
- Access to a terminal/command line (for API calls)
- Internet connection

Step 1: Create Test Providers

Before testing, you need to create dummy providers in the system. These providers will receive referral emails at YOUR email address.

Run this command:

```
curl -X POST https://oscar-zorgcoordinatie-482297690628.europe-
        west4.run.app/api/test/seed-providers \
  -H "Content-Type: application/json" \
  -d '{"email": "YOUR-EMAIL@example.com"}'
```

Replace `YOUR-EMAIL@example.com` with your actual email address.

What this creates:

Provider Type	Name	Location	Postcode
Fysiotherapie	Test Fysiotherapie Amsterdam	Amsterdam	1017AB
Fysiotherapie	Test Fysiotherapie Rotterdam	Rotterdam	3011AA
Ergotherapie	Test Ergotherapie Amsterdam	Amsterdam	1018CD
Diëtist	Test Diëtist Utrecht	Utrecht	3511AB
Stoppen met Roken	Test Stoppen met Roken Coach	Den Haag	2511AB
GLI	Test GLI Coach Amsterdam	Amsterdam	1019EF

Step 2: Complete the Patient Journey

2.1 Start the Questionnaire

1. Open your browser
2. Go to: **https://oscar-zorgcoordinatie-482297690628.europe-west4.run.app**
3. Click **"Start de Vragenlijst"** (Start the Questionnaire)

2.2 Answer the 12 Questions

Answer all questions about your health situation. The system will recommend care pathways based on your answers.

2.3 View Results

After completing the questionnaire, you'll see a results page showing: - Recommended care pathways (Fysiotherapie, Ergotherapie, etc.) - Explanation of each recommendation

2.4 Start the Intake Form

Click **"Ga door naar intake"** to continue to the intake form.

2.5 Complete the Intake Form

The intake form has several sections:

Pathway-Specific Questions

Answer questions related to your recommended care pathways.

Personal Details

Field	Test Value
Naam (Name)	Test Patient
E-mail	your-email@example.com
Telefoon (Phone)	0612345678
Geboortedatum (Birth date)	Any date

Location (Important!)

Field	Test Value
Postcode	**1017AB**
Plaats (City)	Amsterdam

Use postcode 1017AB to match with Amsterdam test providers.

Availability

Select some available time slots for appointments.

Insurance (Optional)

Can be left empty for testing.

2.6 Submit the Form

Click **"Verstuur Aanvraag"** (Submit Request)

Step 3: Verify the Results

3.1 Check Your Email

You should receive two emails:

1. **Provider Invitation Email**
   - Subject: "Oscar - Nieuwe patiënt beschikbaar in Amsterdam"
   - Contains a secure link to view patient details
   - Shows patient initials, location, and care pathway
2. **Patient Confirmation Email**
   - Subject: "Oscar - Bevestiging van uw aanmelding"
   - Confirms the intake was submitted
   - Lists the selected care pathways

3.2 Test the Provider Portal

1. Open the provider invitation email
2. Click the **"Bekijk Details & Accepteer"** button
3. You'll be taken to the secure provider portal
4. Enter the verification code (sent to provider email)
5. View the patient details and accept/decline the referral

3.3 Check Firebase Console (Optional)

If you have access to Firebase Console:

1. Go to **Firestore Database**
2. Check these collections:
   - `referrals` - Contains the new referral
   - `referral_invites` - Contains invites sent to providers
   - `encrypted_referral_data` - Contains encrypted patient data

Test Postcodes Reference

Use these postcodes to test matching with different provider types:

Postcode	City	Matches With
1017AB	Amsterdam	Fysio, Ergo, GLI
1018CD	Amsterdam	Ergo
1019EF	Amsterdam	GLI
3011AA	Rotterdam	Fysio
3511AB	Utrecht	Diet
2511AB	Den Haag	Smoking

Cleanup After Testing

Remove all test providers when done:

```
curl -X DELETE https://oscar-zorgcoordinatie-482297690628.europe-
     west4.run.app/api/test/seed-providers
```

Troubleshooting

No email received?

- Check your spam/junk folder
- Verify SMTP settings are configured correctly

- Check that test providers were created successfully

No providers found error?

- Make sure you ran the seed-providers command first
- Use a postcode that matches test providers (e.g., 1017AB)

Provider portal not working?

- The link expires after 7 days
- Each link can only be used once
- Check that the token in the URL is complete
